

Introducing the

Morningstar SOS™

“Helping make family pools safer”

TARGET MARKET:

- Families with pools and small children

FEATURES:

- Dual Camera System that can rotate 360°.
- Works with provided software to help monitor and send alarms.
- Provides extra security for your pool.

PATENT INFORMATION

A provisional and design patent application has been filed as of January 2018. The patent search was performed by The Mars Rising Network. It was concluded that there is nothing similar to this product on the market, which means this unique, device and app could be patented and used by people with pools.

SUMMARY

The **Morningstar SOS™** is a ground breaking invention that will assist homeowners in making their pools safe for children. This new invention is a type of drone that provides a safe environment, while boosting the security of homeowners. All products are state of the art designed for durability as well as versatility and range in a variety of environments and stresses. The Morningstar SOS™ is a pool alarm to notify

adults that a child is in the water – regardless of time, weather, or any other circumstances.

How does the Morningstar SOS™ works? It all comes to the premier part of the invention, the Dual Camera system. The dual camera forms the phalanx of the unit which are made of High Definition Cameras. The dual cameras are mounted on the top of the platform and on the bottom of the platform. The cameras can detect ripples and waves, indicating that someone or something is in the water. The detector can be calibrated for higher or lower sensitivity as well. The two cameras can rotate 360 degrees and is accessible via phone app which will also alarm various users of the app that a child is in the pool. Will have instant connectivity with 911 to summon the first responders.

The premier targeted audience for the Morningstar SOS™ would be any person or families who owns a pool. This revolutionary and uniquely designed Morningstar SOS™ will allow 24 hours and 7 days a week security on the pool. This innovatively styled elegant design is splash-proof. It will work on any water environment regardless how strong the waves are. The Morningstar SOS™ is the ideal hydro-drone for those that are not at home often and requires an extra security to on the pool.

About the Developer

The inventor, Lee Kamar of Gilbert AZ had an idea to help prevent needless tragedies that can occur when children have fallen into a pool. Lee contacted the Mars Rising Network and had a provisional and design patent application filed and had the invention designed properly so that he may see success with this great idea and turn it into a real product. He is actively seeking a company that would have an interest in licensing the product.
